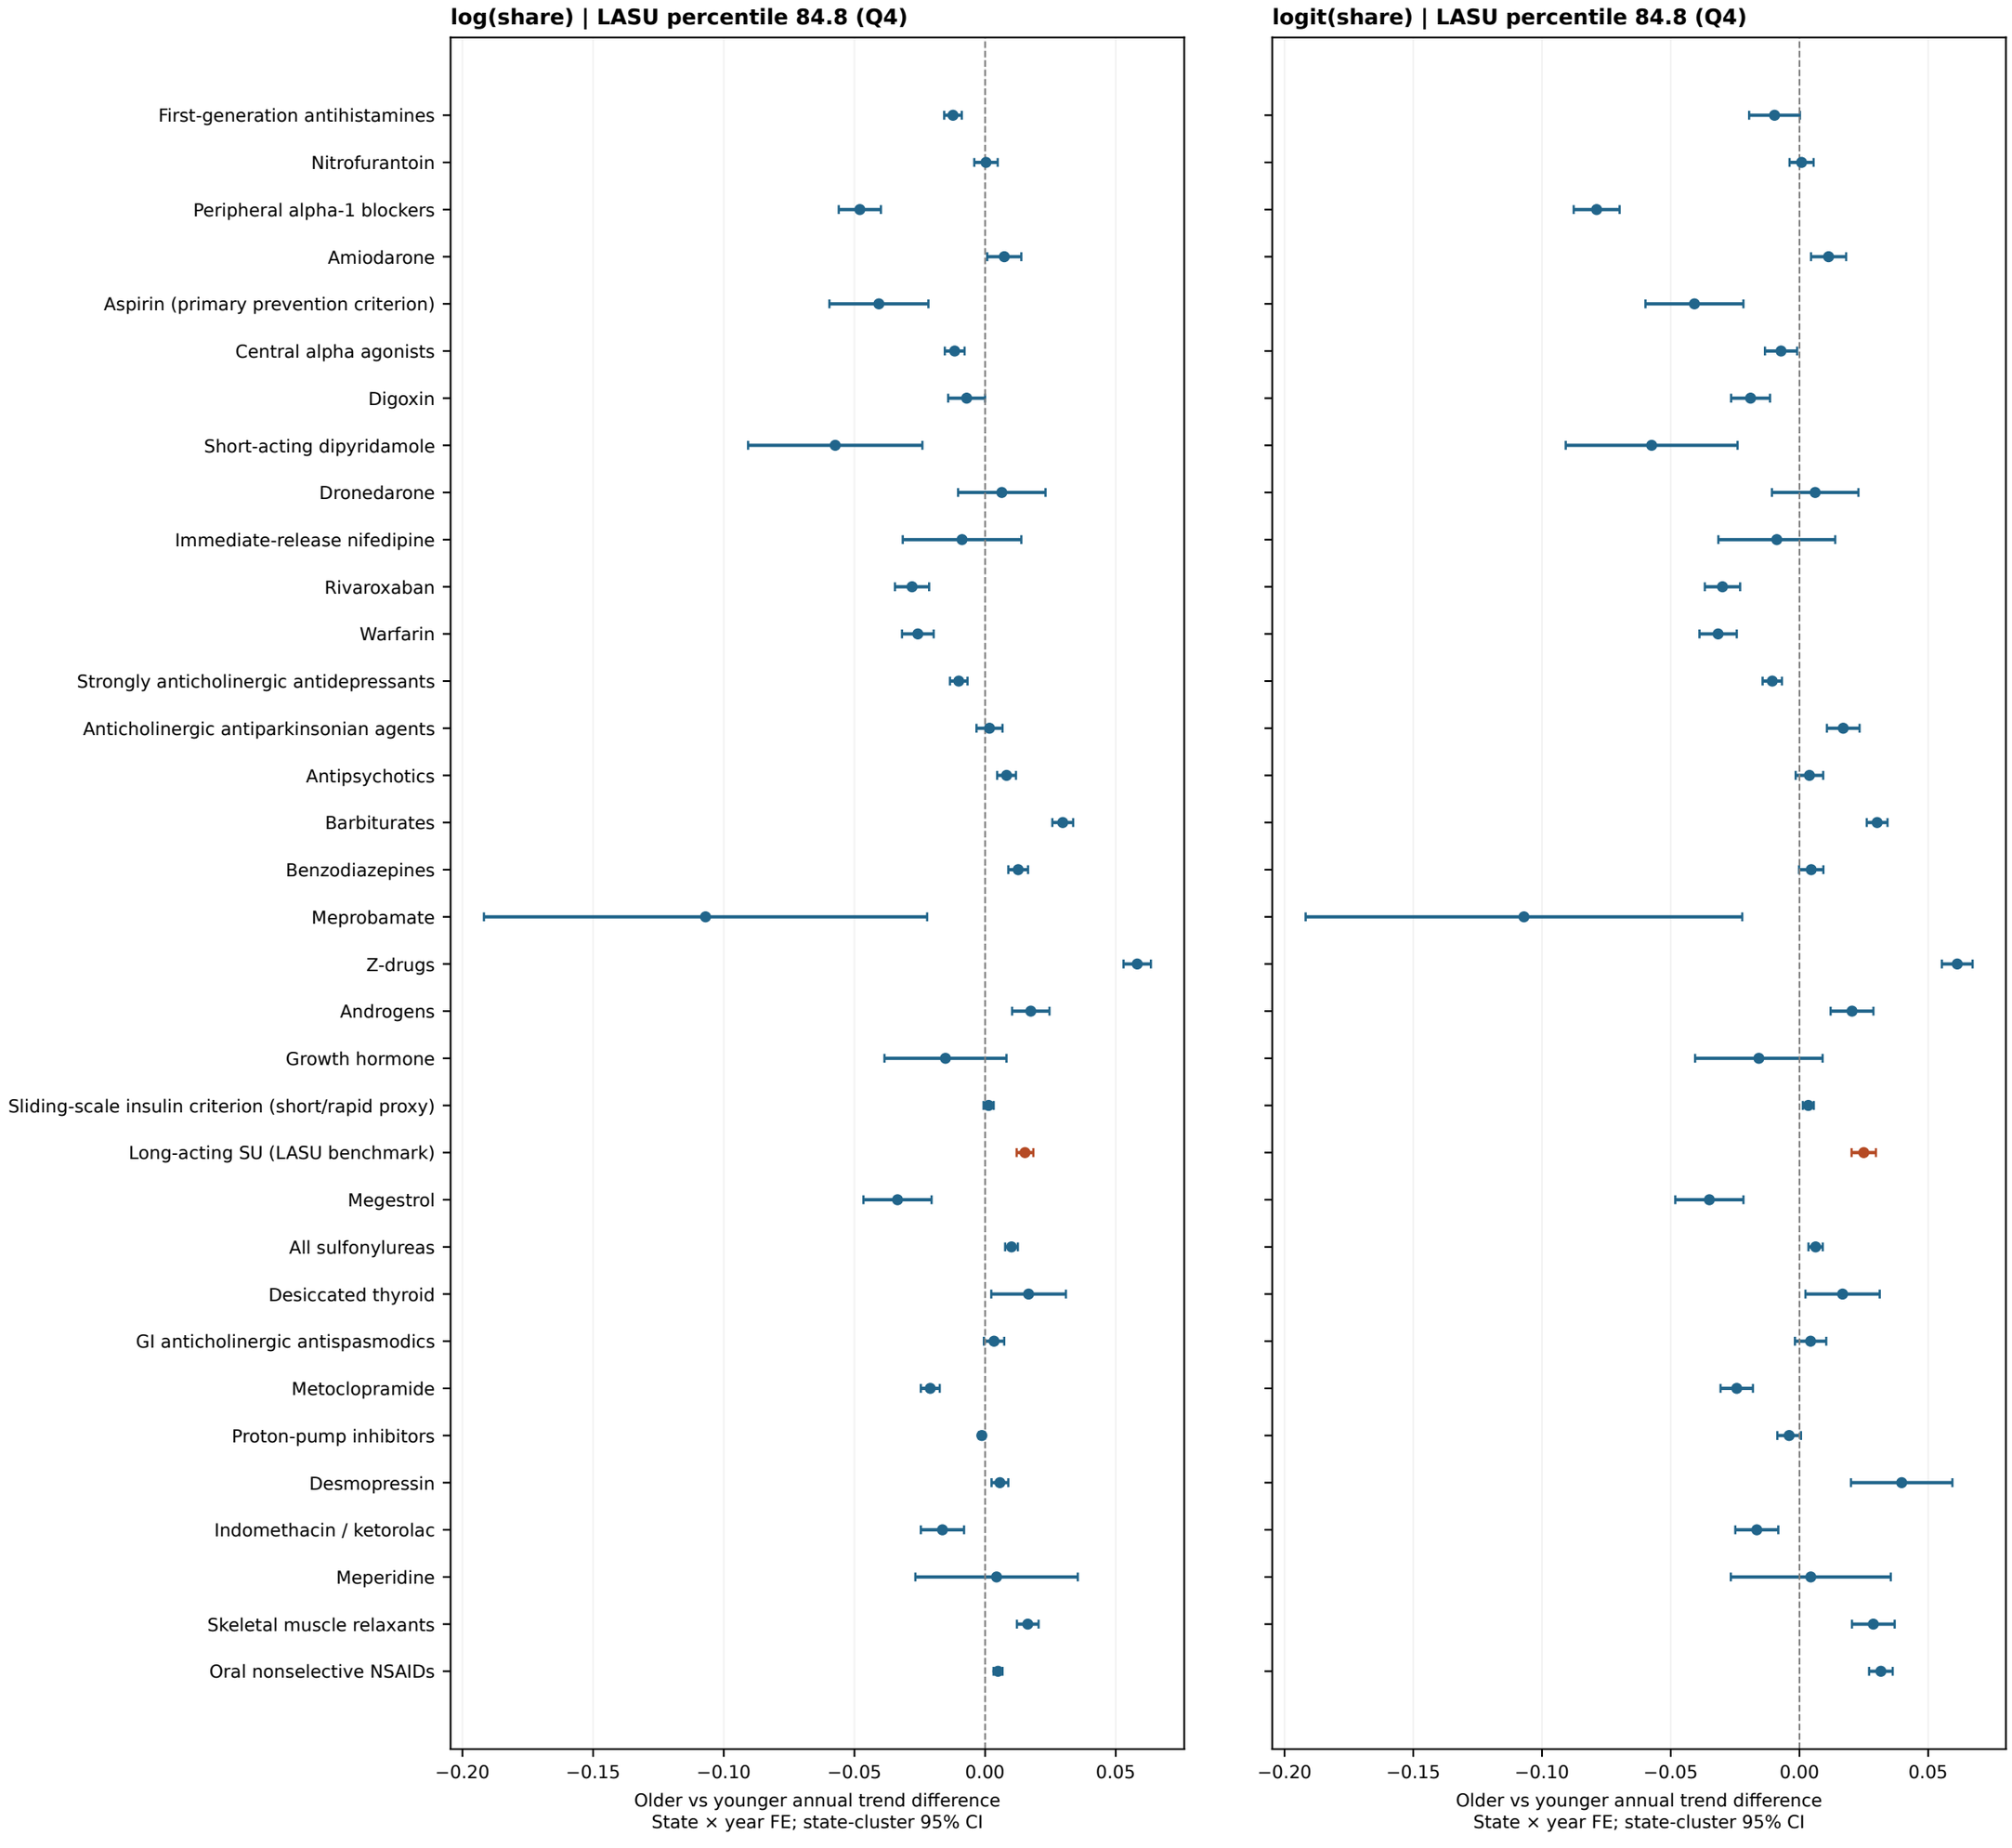
S2-LASU context benchmark: within-therapeutic-class shares, 2013–2024



33 Table 2 exposure entries; orange LASU benchmark is additional and excluded from the percentile reference. 30-day fills.
ATC therapeutic denominators frozen before fitting; GI name-collision corrected. Age-group trends, not Beers policy effects.
Under-65 Part D largely reflects disability-based eligibility; class membership does not establish indication-matched alternatives.
